

Laser Genesis

Laser Genesis skin therapy is an innovative technologically advanced way to promote vibrant and healthy looking skin in men and women. Now you can have a youthful appearance by treating those conditions that are typically associated with premature signs of aging and sun damage, such as excessive redness, large pores, uneven texture, and fine-line wrinkles. The Laser Genesis procedure has been scientifically proven to produce new collagen.

Areas: Face, Neck and Chest

How does Laser Genesis work?

By gently heating the upper dermis well below your skin's surface, Laser Genesis stimulates collagen re-growth. Additional heat is generated in dilated capillaries to reduce redness.

How many treatments will I need?

The treatment results are often subtle. On average, you may require four to six treatments in order to achieve optimal results. Every patient's condition and needs vary. For more information about your expected results or the number of treatments necessary, consult your healthcare professional.

What are the possible side effects?

Although most patients report few if any side effects, the most common is a slight redness that disappears within a few hours of treatment. Consult your healthcare professional for complete information about the benefits and risks of treatment.

What kind of textural improvements can you expect with Laser Genesis skin therapy?

Over the course of four to five treatments, Laser Genesis can help restore the skin's youthful glow and appearance by smoothing out uneven texture caused by aging, sun damage or scars. You will see a more even, healthy complexion as large pores are reduced in size, and minor imperfections are diminished. The individual treatment results are subtle, but the overall effect of multiple treatments can be quite dramatic.
